

**Notes to the unaudited financial statements
for nine months ended 30 September 2011****1. General**

Al Kamil Power Company SAOG (the “Company”) was registered and incorporated on 15 July 2000 as a closed joint stock company in the Sultanate of Oman. The Company was set up to build and operate a 285 MW electricity generating station at Al Kamil in the Sharqiya Region. The Company was converted to a general joint stock company on 22 September 2004.

2. Significant agreements

The Company has entered into the following significant agreements:

- (i) Power Purchase Agreement (“PPA”) with the Ministry of Housing, Electricity and Water (“MHEW”), Sultanate of Oman, granting the Company a long-term power supply agreement for a period of fifteen Years commencing from the scheduled commercial operation date (COD). Under the terms of PPA, the Company has the right and obligation to generate electricity. The Company was granted a Generation Licence by the Authority for Electricity Regulation (“AER”), a state regulatory body established under the Sector Law.

On 1 May 2005, the PPA was novated to Oman Power and Water Procurement Co. SAOC (OPWP), a closed joint stock company owned by the Government of Oman (“Government”). All the financial commitments of OPWP are guaranteed by the Government of Oman. Provisions for novation and Government Guarantee were embodied in the PPA. The provisions for novation were enacted pursuant to the promulgation of the Sector Law in August 2004.

Power Purchase Amendment Agreement to supply additional power generating capacity of 14 MW for the Summer Period for the three years 2010-2012 was signed with OPWP.

- (ii) Natural Gas Sales Agreement (“NGSA”) with the Ministry of Oil and Gas (“MOG”) for the purchase of natural gas from MOG for the period of fifteen years at a pre-determined price.
- (iii) Usufruct agreement with the Government for grant of Usufruct rights over the project site for 25 years.
- (iv) Operation & Maintenance Agreement (“OAMA”) with Al Kamil Construction & Services LLC (“AKCS”), a company incorporated in the Sultanate of Oman, and a related party, for operations and maintenance of the power plant. The OAMA is valid for a period of 15 years from the scheduled commercial operations date or the termination date of PPA, whichever is earlier.
- (v) Generation Licence granted by the Authority for Electricity Regulation, a governmental regulatory body established under the Sector Law.
- (vi) Agreement with Société Générale and Bank Muscat SAOG for long-term loan facilities.
- (vii) Agreement with National Bank of Oman for Stand-by Letter of Credit to fund the debt service reserve requirements of the long-term loan facilities.
- (viii) Electricity Connection Agreement (ECA) with Oman Electricity Transmission Company SAOC (OETC) for establishing a framework between OETC and the Company to provide connection of the power station to the transmission system and enforcement of the Grid Code between OETC and the Company.

4. Summary of significant accounting policies

Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as promulgated by the International Accounting Standards Board, and comply with the disclosure requirements set out in the Rules for Disclosure and Proformas issued by the Capital Market Authority and the requirements of the Commercial Companies Law of 1974, as amended.

Basis of preparation

These financial statements are prepared on the historical cost basis except for financial instruments, which are stated at fair value. The accounting policies have been consistently applied by the Company and are consistent with those used in the previous quarter.

The financial statements are presented in Rials Omani ("RO") and United States Dollars ("US\$"), rounded off to the nearest thousand.

Intangible assets

The Company considers an intangible asset as an identifiable non-monetary asset without physical substance. The three critical attributes of an intangible asset are:

- identifiability;
- control (power to obtain benefits from the asset); and
- future economic benefits (such as revenues or reduced future costs).

An intangible asset is identifiable when it:

- is separable (capable of being separated and sold, transferred, licensed, rented, or exchanged, either individually or as part of a package) or
- arises from contractual or other legal rights, regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.

Notes to the financial statements for the 3rd Quarter ended 30 September 2011 (continued)

4. Summary of significant accounting policies (cont.)

Intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses.

Amortisation is the systematic allocation of the depreciable amount of an intangible asset over its estimated useful life. Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated amortisation and accumulated impairment losses thereon. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Property, plant and equipment (continued)

Items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses.

Subsequent expenditure

Expenditure incurred to replace a component of an item of property, plant and equipment that is accounted for separately, including major inspection and overhaul expenditure is capitalised. Other subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the item of property, plant and equipment. All other expenditure is recognised in the profit or loss as an expense as incurred.

Depreciation

Depreciation is charged on a straight-line basis over the estimated useful lives of items of property, plant and equipment and major components that are accounted for separately as follows:

	<u>Year</u>
Plant and machinery	6 - 30
Buildings and civil works	40
Other assets	
- Furniture, fixtures and office equipment	4
- Motor vehicles and computer equipment	3

Depreciation is charged from the month of addition to property, plant and equipment while no depreciation is charged in the month of sale. Depreciation method, useful lives as well as residual values are re-assessed annually.

Impairment

The carrying amounts of the Company's assets, other than inventories and deferred tax assets are reviewed at each reporting period to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. Recoverable amount is the higher of an asset's fair value less costs to sell and its value in use. An impairment loss is recognised in the profit or loss whenever the carrying amount of an asset exceeds its recoverable amount.

**Notes to the financial statements
for the 3rd Quarter ended 30 September 2011 (continued)****4. Summary of significant accounting policies (continued)**

In assessing value in use, the estimated cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss in respect of a receivable is reversed if the subsequent increase in the recoverable amount can be related objectively to an event occurring after the impairment loss was recognised. In respect of other assets, an impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the assets' carrying amount does not exceed the carrying amount that would have been determined net of depreciation or amortisation, if no impairment loss had been recognised.

Borrowing costs

Borrowing costs comprise interest payable on borrowings. Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the cost of those assets. All other borrowing costs are recognized as expenses in the period in which they are incurred.

Inventories

Fuel and maintenance spares inventory is stated at the lower of cost and net realisable value. Cost is determined on the weighted average principle and includes all costs incurred in acquiring the inventories and bringing them to their existing location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

Cash and cash equivalents

Cash and cash equivalents comprise cash and bank balances and bank deposits with a maturity of less than three months from the date of placement. Bank overdrafts that are repayable on demand and form an integral part of the Company's cash management are included as a component of cash and cash equivalents for the purposes of the statement of cash flows.

Interest bearing borrowings

Interest bearing borrowings are recognised initially at cost, less attributable costs such as loan arrangement fee and interest during the construction period. Subsequent to initial recognition, interest bearing borrowings are stated at amortised cost with any difference between cost and redemption value being recognised in the profit or loss over the period of borrowings on an effective interest rate basis.

**Notes to the financial statements
for the 3rd Quarter ended 30 September 2011 (continued)****4. Summary of significant accounting policies (continued)****Payables and accruals**

Other payables and accruals are stated at their amortised cost.

Provisions

A provision is recognised in the statement of financial position when the Company has a legal or constructive obligation, as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

Foreign currencies

Transactions in foreign currencies are translated to Rials Omani at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting period are translated to Rials Omani at the foreign exchange rate ruling at that date. Non-monetary assets and liabilities denominated in foreign currencies that are stated at historical cost, are translated to Rials Omani at the foreign exchange rate ruling at the date of the transaction. All foreign exchange differences are recognised in the profit or loss.

Financial instruments

Financial assets and financial liabilities are recognized on the Company's statement of financial position when the Company becomes a party to the contractual provisions of the instrument.

Tariff and other receivables are initially measured at their fair value and subsequently measured at amortised cost, using the effective interest method. Appropriate allowances for estimated irrecoverable amounts are recognised in the profit or loss when there is objective evidence that the asset is impaired.

Trade and other payables are initially measured at their fair value and subsequently measured at amortised cost, using the effective interest method.

Derivative financial instruments and hedging

The Company uses derivative financial instruments to hedge its exposure to certain portion of its interest rate risks arising from financing activities. In accordance with its treasury policy, the Company does not hold or issue derivative financial instruments for trading purposes. However, derivatives that do not qualify for hedge accounting are accounted for as trading instruments.

**Notes to the financial statements
for the 3rd Quarter ended 30 September 2011 (continued)****4. Summary of significant accounting policies (continued)****Derivative financial instruments and hedging (continued)**

Derivative financial instruments are recognised initially at cost. Subsequent to initial recognition, derivative financial instruments are stated at their fair value. Recognition of any resultant gain or loss depends on the nature of the item being hedged.

Where a derivative financial instrument is designated as a hedge of the variability in cash flows of a recognised liability, the effective part of any gain or loss on the derivative financial instrument is recognised directly in equity. The ineffective part of any gain or loss is recognised in the profit or loss immediately.

Revenue

Operating revenue comprises tariffs for fixed capacity and energy charges. Tariffs are calculated in accordance with the Power Purchase Agreement (PPA). The revenue is recognised on the basis of operating lease. No revenue is recognised if there are significant uncertainties regarding recovery of the consideration due and associated costs.

Interest income is recognised in the profit or loss using effective interest rate method.

Operating lease payments

Payments made under operating leases are recognised on a straight-line basis over the term of the lease.

Employee benefits

Provision in respect of employee benefits for non-Omani employees is made in accordance with the Oman labour laws, and is based on current remuneration and cumulative Year of service at the reporting period date.

Retirement benefits for Omani employees are contributed in accordance with the terms of the Social Securities Law of 1991.

Income tax

Income tax on the results for the quarter comprises deferred tax. Income tax is recognised in the profit or loss except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Deferred tax is provided on all temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is calculated on the basis of the tax rates that are expected to apply to the period when the asset is realised or the liability is settled. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the unused tax losses and credits can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

**Notes to the financial statements
for the 3rd Quarter ended 30 September 2011 (continued)****5. Critical accounting judgments and key sources of estimation uncertainty**

The presentation of financial statements, in conformity with IFRSs, requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenditures. The estimates and associated assumptions are based on historical experiences and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from those estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the significant estimates used in the preparation of the financial statements:

(i) *Useful lives of property, plant and equipment*

Depreciation is charged so as to write off the cost of assets over their estimated useful lives. The calculation of useful lives is based on management's assessment of various factors such as the operating cycles, the maintenance programs, and normal wear and tear using its best estimates.

(ii) *Decommissioning costs*

Decommissioning costs are based on management's technical assessment of the probable future costs to be incurred in respect of the decommissioning of the plant facilities.

6. Intangible assets

Pursuant to the Natural Gas Sales Agreement (NGSA) with the Ministry of Oil and Gas (MOG), the Company, effective November 2007, transferred "Natural Gas Reception System" comprising multiple streams with redundancy, each providing pressure reduction and control filtering, condensate extraction, heating, metering and on-line gas calorific value analysis, to MOG. Although the ownership of this asset was transferred to MOG, the Company retains the beneficial economic use of the asset until the expiry of the NGSA, i.e., 30 April 2017.

In terms of the Company's stated policy on intangible assets and amortisation, the book value of the Natural Gas Reception System of RO 620,000 (US\$ 1.612 million) has been classified as intangible asset which will be amortised until the expiry of NGSA.

13. Legal reserve

The Commercial Companies Law of 1974 requires that 10% of a company's net profit be transferred to a non-distributable legal reserve until the amount of legal reserve becomes equal to one-third of the company's share capital. This reserve is not available for distribution.

**Notes to the financial statements
for the 3rd Quarter ended 30 September 2011 (continued)**

14. Hedging deficit

The term loan facilities of the Company bear interest at US LIBOR plus applicable margins. In accordance with the Term Loan Agreement, the Company is obliged to fix the rate of interest through Interest Rate Swap Agreements ("IRS") for a minimum of 75% of its loan facility. In 2002, IRS amounting to approximately 75% of the loan was hedged at a fixed interest rate of 6.29% per annum, excluding margin. During 2005, further 11% of the loan was hedged at a fixed interest rate of 4.1325% per annum, excluding margin.

As at 30 September 2011, based on the interest rate differential over the life of the IRS, an indicative deficit was assessed at approximately RO 2.315 million (US\$ 6.019 million) [30 September 2010 – RO 2.582 million (US\$ 6.713 million)] by the counter parties to the IRS. In order to comply with International Accounting Standard 39 "Financial Instruments: Recognition and Measurement" fair value of the hedge instruments' indicative losses in the amount of approximately RO 2.083 million (US\$ 5.416 million) [30 September 2010 – RO 2.582 million (US\$ 6.713 million)] has been recorded within the equity of the Company under "Hedging Deficit" and a similar amount is recorded under long term liabilities.

15. Taxation

Income tax

By virtue of Royal Decree 54/2000 the Company was exempt from income tax for an initial period of five Years which ended on 30 September 2007.

The assessments for the Years 2007 - 2010 have not been finalised by the Department of Taxation Affairs, Ministry of Finance. The management believes that the tax assessed, if any, in respect of the un-assessed tax periods would not be material to the financial position of the Company as at 30 September 2011. No provision for current quarter tax has been made as the Company has set-off taxable income for the period against previous Years' tax losses brought forward.

Notes to the financial statements
for the 3rd Quarter ended 30 September 2011 (continued)

15. Taxation (continued)

Deferred tax

At 30 September 2011, the Company's deferred tax liability amounts to approximately RO 2.483 million (US\$ 6.456 million) [September 2010 – RO 2.144 million (US\$ 5.574 million)] arising on temporary timing differences. The movement in deferred tax liability during the quarter is as follows:

	Q3-2011	Q3-2011	Q3-2010	Q3-2010
	RO'000	US \$'000	RO'000	US \$'000
at 1 Jan 2011	2,332	6,063	1,994	5,184
Deferred tax charge for the period	274	712	273	710
at 30 Sep 2011	2606	6775	2267	5894

Deferred tax expense represents the origination and reversal of temporary differences in respect of the following:

Accelerated depreciation	3,817	9,924	4,021	10,455
Tax loss	(1,211)	(3,149)	(1,754)	(4,561)
	2,606	6,775	2,267	5,894

The current deferred tax liability is based on the assumption that the tax losses incurred during tax-exempt period would be available for carry forward indefinitely in post tax-exempt period. The Department of Taxation Affairs could disagree with the Company on the availability of tax losses incurred during the tax exemption period, against future taxable profits. Should this be the case, the Company would need to recognise an additional deferred tax liability of RO 1.351 million (US\$ 3.51 million) as of 30 September 2011 [September 2010 – RO 1.351 million (US\$ 3.51 million)].

Secured loan

The Company has syndicated long-term loan facility from financial institutions in the aggregate amount of approximately RO 36 million (US\$ 94 million). Société Générale and Bank Muscat SAOG are the arrangers of the facilities and have respectively been appointed as the offshore and on-shore security agents for the secured finance parties and as the security trustees. Société Générale is also the Facility and Security Agent for administration and monitoring of the overall loan facilities. The loan agreement contains certain restrictive covenants, which include, amongst others, restrictions over debt service and debt equity ratios, certain restrictions on the transfer of shares, payment of dividends, disposal of property, plant and equipment and incurrence of additional debt.

29. Financial risk management

The Company has exposure to the following risks from its use of financial instruments:

- (i) Credit risk
- (ii) Liquidity risk
- (iii) Market risk

Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the receivables from a customer. The Company does not require collateral in respect of financial assets. The Company seeks to control credit risk by monitoring credit exposure. At 30 September 2011 the entire trade receivables were from a Government owned company, Oman Power and Water Procurement Company SAOC ("OPWP"). The maximum exposure to credit risk as of the end of September 2011 was RO 3.821 million (US \$ 9.934 million) [September 2010: RO 1.761 million (US \$ 4.577 million)]. OPWP has a credit rating of A1 given by Moody's (Internet website). The Company has maintained all cash deposits with banks having credit rating by Moody's of Aa3 and above.

for the 3rd Quarter ended 30 September 2011 (continued)

29. Financial risk management (continued)

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. As of 30 September 2011, the Company was not materially exposed to any liquidity risk.

The following are the contractual maturities of financial liabilities:

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return. As of 30 September, the Company's market risk due to foreign exchange rates is analysed as under:

Financial assets / liabilities:

29. Financial risk management (continued)

Amounts denominated in non RO are based in US Dollars. The foreign currency risk is minimal as the US Dollar is pegged to the Rials Omani.

The sensitivity of the hedging deficit as assessed by the counter parties to the Interest Rate Swap Agreements is given below:

Impact on statement of financial position: increase / (decrease).

	Q3-2011 RO'000	Q3-2010 RO'000
In case of increase of 100 basis points in interest rates	444	611
In case of decrease of 100 basis points in interest rate	(444)	(611)

Interest rate risk

At the end of the reporting period the interest rate profile of the Company's interest bearing financial instruments was:

	Q3-2011 RO'000	Q3-2010 US \$'000	Q3-2010 RO'000	Q3-2010 US \$'000
Floating rate instruments				
Financial assets	<u>1,516</u>	<u>3,942</u>	<u>3,301</u>	<u>8,583</u>

Fair value sensitivity analysis for fixed rate instruments

The Company does not account for any fixed rate financial assets or liabilities at fair value through profit or loss. Therefore a change in interest rates at the end of the reporting period would not affect profit or loss.

The Company has entered into an interest rate swap to hedge its interest rate risk exposure. Under interest rate swap contracts, the Company agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the Company to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt.

All interest rate swap contracts exchanging floating rate interest amounts for fixed rate interest amounts are designated as cash flow hedges in order to reduce the Company's cash flow exposure resulting from variable interest rates on borrowings. The interest rate swaps and the interest payments on the loan occur simultaneously.

**Notes to the financial statements
for the 3rd Quarter ended 30 September 2011 (continued)**

30. Fair value of financial instruments

The Management believes that the fair values of all financial assets and liabilities of the Company are not different from their carrying amounts at 30 September 2011.

31. Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and benefit other stakeholders. The management's policy is to maintain a strong capital base so as to maintain creditor and stakeholders' confidence and to sustain future development of the business.

Management is confident of improving the current level of profitability by enhancing top line growth and prudent cost management.

32. Approval of financial statements

These unaudited financial statements were approved by the Board of Directors and authorized for issue on 25 October 2011.
